We ask that you please treat the gear as if it was your own, as others will need to rely on it as well. You will be required to pay for damaged/lost equipment.

Do not cook inside your tent. This can deplete oxygen and can damage the tent leaving you without shelter. Use of your camp stove to heat your tent can cause you to run out of propane. Bringing the proper gear will have you outfitted to be comfortable without wasting fuel in this manner.

This equipment is rented in Kotzebue and returned to our Kotzebue facilities when your hunt is complete.

PLEASE NOTE: If you require any special medicine and/or foods associated with your daily diet and health routine, you will want to make sure you pack it yourself and bring it with you. The items listed are a basic guideline which fits into the 125 pounds of gear which can be transported into the field.
